

HandsOn-2

Create a react app for Student Management Portal named StudentApp and create a component named Home which will display the Message “Welcome to the Home page of Student Management Portal”. Create another component named About and display the Message “Welcome to the About page of the Student Management Portal”. Create a third component named Contact and display the Message “Welcome to the Contact page of the Student Management Portal”. Call all the three components.

Implementation

→ App.js

```
// src/App.js

import React, { Component } from 'react';

import './App.css';

import Home from './components/Home';

import About from './components/About';

import Contact from './components/Contact';

class App extends Component {

  render() {

    return (

      <div className="App">

        <Home />

        <About />

        <Contact />

      </div>

    );

  }

}

export default App;
```

→ Home.js

```
// src/components/Home.js

import React, { Component } from 'react';
```

```
class Home extends Component {  
  render() {  
    return (  
      <div className="center-content">  
        <h3>Welcome to the Home Page of Student Management Portal</h3>  
      </div>  
    );  
  }  
}  
  
export default Home;
```

→About.js

```
// src/components/About.js  
  
import React, { Component } from 'react';  
  
class About extends Component {  
  render() {  
    return (  
      <div className="center-content">  
        <h3>Welcome to the About Page of Student Management Portal</h3>  
      </div>  
    );  
  }  
}  
  
export default About;
```

→Contact.js

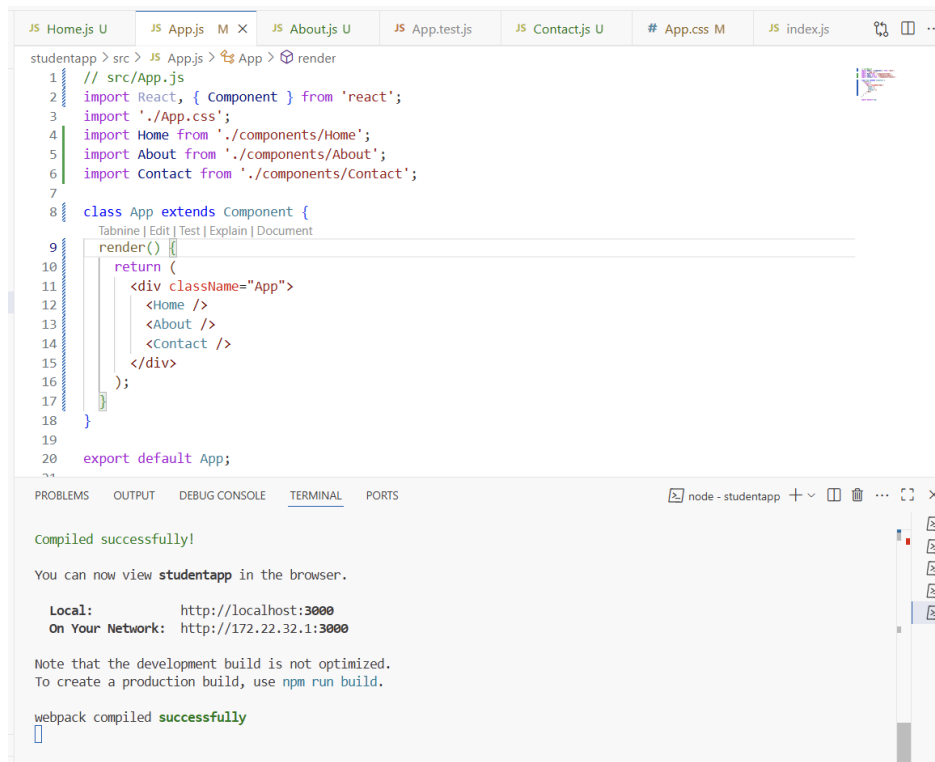

```
// src/components/Contact.js  
  
import React, { Component } from 'react';
```

```
class Contact extends Component {  
  render() {  
    return (  
      <div className="center-content">  
        <h3>Welcome to the Contact Page of Student Management Portal</h3>  
      </div>  
    );  
  }  
}  
  
export default Contact;
```

→App.css

```
/* src/App.css */  
  
.App {  
  text-align: center;  
  padding-top: 100px;  
  font-family: Arial, sans-serif;  
}  
  
.center-content {  
  margin: 20px auto;  
}
```

Output

The screenshot shows the VS Code editor with the `App.js` file open. The code defines a `App` component that renders a `div` containing `Home`, `About`, and `Contact` components. The terminal at the bottom shows the successful compilation of the application and the local network address for viewing the application in a browser.

```
studentapp > src > JS App.js > App > render
1 // src/App.js
2 import React, { Component } from 'react';
3 import './App.css';
4 import Home from './components/Home';
5 import About from './components/About';
6 import Contact from './components/Contact';
7
8 class App extends Component {
9   render() {
10     return (
11       <div className="App">
12         <Home />
13         <About />
14         <Contact />
15       </div>
16     );
17   }
18 }
19
20 export default App;
```

PROBLEMS OUTPUT DEBUG CONSOLE TERMINAL PORTS

node - studentapp

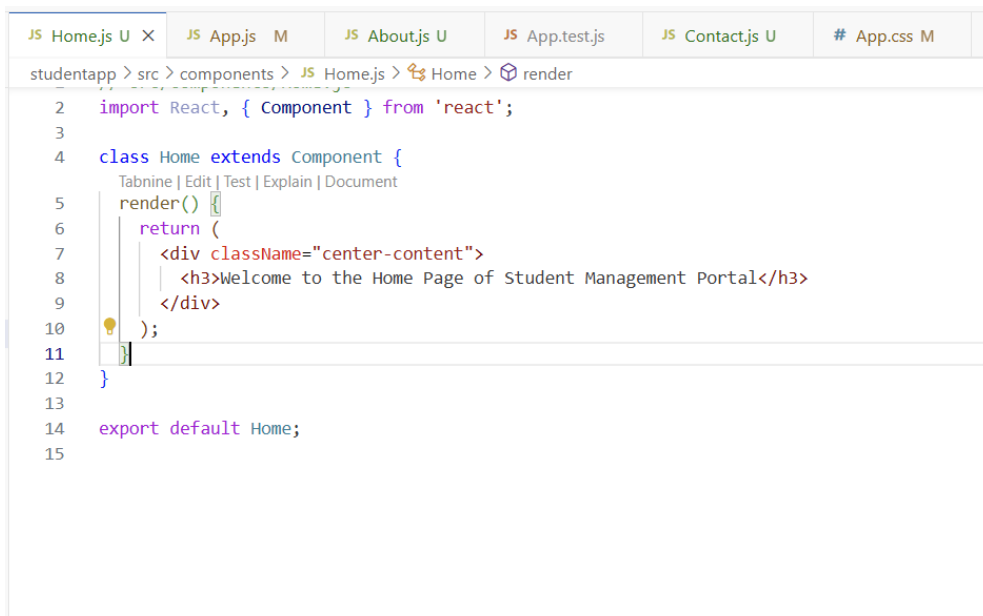

Compiled successfully!

You can now view **studentapp** in the browser.

Local: http://localhost:3000
On Your Network: http://172.22.32.1:3000

Note that the development build is not optimized.
To create a production build, use `npm run build`.

webpack compiled successfully

The screenshot shows the VS Code editor with the `Home.js` file open. The code defines a `Home` component that renders a `div` containing an `h3` element with the text "Welcome to the Home Page of Student Management Portal".

```
studentapp > src > components > JS Home.js > Home > render
2 import React, { Component } from 'react';
3
4 class Home extends Component {
5   render() {
6     return (
7       <div className="center-content">
8         <h3>Welcome to the Home Page of Student Management Portal</h3>
9       </div>
10     );
11   }
12 }
13
14 export default Home;
15
```

Welcome to the Home Page of Student Management Portal

Welcome to the About Page of Student Management Portal

Welcome to the Contact Page of Student Management Portal
