

HandsOn-9

Create a React Application named “cricketapp” with the following components:

1. ListofPlayers
2. IndianPlayers

Implementation

→App.js

```
// src/App.js

import React from 'react';
import './App.css';
import ListofPlayers from './components/ListofPlayers';
import IndianPlayers from './components/IndianPlayers';
function App() {
  return (
    <div className="App">
      <h1> 🏏 Cricket App Dashboard</h1>
      <div className="section">
        <ListofPlayers />
      </div>
      <hr className="divider" />
      <div className="section">
        <IndianPlayers />
      </div>
    </div>
  );
}
export default App;
```

→App.css

```
.App {  
  padding: 20px;  
  text-align: left;  
}  
  
.section {  
  background-color: #f5f5f5;  
  padding: 15px;  
  border-radius: 10px;  
  margin-bottom: 30px;  
  box-shadow: 0 0 10px rgba(0,0,0,0.1);  
}  
  
ul {  
  list-style-type: square;  
  padding-left: 20px;  
}  
  
.divider {  
  margin: 20px 0;  
  border: none;  
  border-top: 2px solid #aaa;  
}
```

→IndianPlayers.js

```
// src/components/IndianPlayers.js  
  
import React from 'react';  
  
const IndianPlayers = () => {
```

```
const oddTeam = ["Virat", "Dhoni", "Pant", "Shami", "Bumrah"];
const evenTeam = ["Rohit", "Gill", "Hardik", "Ashwin", "Kohli"];
const T20players = ["Rahul", "Chahal"];
const RanjiPlayers = ["Sarfraz", "Pujara"];
const mergedPlayers = [...T20players, ...RanjiPlayers];
```

```
return (
  <div>
    <h3>Odd Team Players</h3>
    <ul>
      {oddTeam.map((name, idx) => <li key={idx}>{name}</li>)}
    </ul>
    <hr className="divider" />

    <h3>Even Team Players</h3>
    <ul>
      {evenTeam.map((name, idx) => <li key={idx}>{name}</li>)}
    </ul>
    <hr className="divider" />

    <h3>List of Indian Players (T20 + Ranji)</h3>
    <ul>
      {mergedPlayers.map((name, idx) => <li key={idx}>{name}</li>)}
    </ul>
  </div>
);
};
export default IndianPlayers;
```

→LisOfPlayers.js

```
// src/components/ListofPlayers.js
```

```
import React from 'react';
```

```
const ListofPlayers = () => {
```

```
  const players = [
```

```
    { name: "Virat", score: 95 },
```

```
    { name: "Rohit", score: 88 },
```

```
    { name: "Dhoni", score: 67 },
```

```
    { name: "Gill", score: 78 },
```

```
    { name: "Pant", score: 54 },
```

```
    { name: "Hardik", score: 91 },
```

```
    { name: "Shami", score: 62 },
```

```
    { name: "Ashwin", score: 72 },
```

```
    { name: "Bumrah", score: 85 },
```

```
    { name: "Surya", score: 66 },
```

```
    { name: "Kohli", score: 99 },
```

```
  ];
```

```
  const below70 = players.filter(player => player.score < 70);
```

```
  return (
```

```
    <div>
```

```
      <h3>All Players</h3>
```

```
      <ul>
```

```
        {players.map((p, index) => (
```

```
          <li key={index}>{p.name} - {p.score}</li>
```

```
        ))}
```

```
      </ul>
```

```
      <hr className="divider" />
```

```
<h3>Players with score below 70</h3>
<ul>
  {below70.map((p, index) => (
    <li key={index}>{p.name} - {p.score}</li>
  ))}
</ul>
</div>

);
};
export default ListofPlayers;
```

Output

```
cricketapp > src > JS App.js > App
2 | import React from 'react';
3 | import './App.css';
4 | import ListofPlayers from './components/ListofPlayers';
5 | import IndianPlayers from './components/IndianPlayers';
6 |
7 | function App() {
8 |   return (
9 |     <div className="App">
10 |       <h1> Cricket App Dashboard</h1>
11 |
12 |       <div className="section">
13 |         <ListofPlayers />
14 |       </div>
15 |
16 |       <hr className="divider" />
17 |
18 |       <div className="section">
19 |         <IndianPlayers />
20 |       </div>
21 |     </div>
22 |   );
23 | }
24 |
```
